

Changing Desktop Backgrounds Tutorial #7

Changing Desktop Backgrounds

A desktop background is the customized background that is on right when you turn on your computer. To create your own background you must:

- (1) Right click with your mouse on the desktop (not on icons)
- (2) Left click on "Properties"
- (3) Left click on "Desktop"
- (4) Here you will be given a choice of selecting a Windows background or you can select "browse" to choose your own saved image
- (5) Change the background colour and position by left clicking on "position" and "color"
- (6) Left click "Apply"

Finding Internet Wallpapers

You can find desktop backgrounds online by doing a search in a search engine for "desktop wallpapers." Once you find your background you:

- (1) On the photo, right click
- (2) Left click on "apply as background image"

(Note: If there is different Wallpaper sizes, choose the size of the wallpaper according to the size of your monitor. If it is just an Internet image, make sure that it is a large enough photo to be a wallpaper. If it is not large enough the photo will not be clear)
